## HYBRID PERPETUAL ROSES

Hybrid Perpetuals or "June bloomers" generally burst forth into a marvelous display of bloom in June. Many will bloom again later in the season. Their flowers on the whole are more richly fragrant than any other class and are of very large size. The plants are too large to fit in a Rose-bed of Hybrid Teas but are more foolproof and long-lived. Plant them in the background and in shrub borders. Many of the strongest growers can be trained as pillars, and as such are very effective.

**Frau Karl Druschki.** A very strong, tall grower which blooms sparsely during the Summer and Fall after bearing bountifully in the Spring. Pure white when open, with prominent yellow stamens but no fragrance. Very large, attractive flowers. \$1.00.

**General Jacqueminot (General Jack for short).** One of the greatest favorites of the old Roses. It has large, very double and very fragrant, deep red blooms mostly in June. \$1.00.

**Georg Arends.** The charming perfect rose-pink blooms make it greatly esteemed. Flowers are high centered and especially well formed. \$1.00.

**J. B. Clark.** The very large red blooms are shaded maroon. Bush is a very vigorous, tall grower. Very thorny. Try pegging down some of the long canes. So treated they will put out bloom stems at every eye. \$1.00.

**Mrs. John Laing.** You can't forget the delicious fragrance of these large, full, double, soft pink cupped blooms. The two-tone pink flowers come occasionally in the Summer as well as abundantly in June. \$1.00.

**Paul Neyron.** The largest pink Rose, with almost thornless stems. Blooms abundantly in June and sparingly in late Summer. \$1.00.

**Ulrich Brunner.** The large, globular cherry-red blooms, always refreshing and very lasting. \$1.00.
